GRAYHOUSE

METHODOLOGY

Interview Dates	October 18-20, 2026
Target Population	Likely voters in Arizona statewide
Sampling Method	Voter-file sample of registered voters in Arizona; interviews completed by SMS text-to-web and live telephone calls to cell phones and landlines.
Disclosure Notes	Sponsored by Friends of Elijah Norton.
Weighting	Weighted to reflect the likely November 2026 electorate in Arizona. The weights balance gender, age, race, region of the state and 2024 presidential vote (Trump 48%, Harris 46%), along with other demographic and partisan characteristics. Final weights are calibrated to GrayHouse's political engagement modeling, which aligns the sample with the turnout behavior of the expected electorate rather than relying on self-reported likelihood to vote alone. Counts shown in tables are rounded weighted counts; percentages and breakouts are weighted.
Number of respondents	550
Margin of error	+/- 4.2% at 95% confidence
Survey Modes	SMS text-to-web: 60% (n=330); Live-to-cell: 35% (n=192); Live-to-landline: 5% (n=28).
