Independent Candidate Dan Osborn Has Advantage in Nebraska's US Senate Contest, Even as Incumbent GOP Governor Poised to Win 2nd Term:

SurveyUSA research conducted exclusively for Grant Forbes, LLC, shows independent Dan Osborn with a small advantage in his second run for United States Senator, though Nebraska's incumbent Republican governor is well-positioned to be re-elected to his seat.

For Governor , Republican Jim Pillen takes 43% of the vote today, 8 points atop Democrat Lynne Walz, a former state senator, at 35%. 13% of likely voters say they will vote for another candidate in the race; 9% are undecided.

Pillen and Walz run similarly strongly among their bases, with Pillen leading by 67 points among Republicans and 68 points among conservatives, while Walz leads by 65 points among Democrats and by 71 among liberals. Independents and moderates and both break for the Democrat, by margins of 30 and 26 points, respectively. Pillen leads by 15 points among men, Walz by 1 nominal point among women – a 16-point gender gap. Walz leads by 16 points among the youngest and typically least-reliable voters, while Pillen has a 3-point edge among voters 35 to 49, leads by 15 points among 50-to-64-year-old voters, and by 27 points among those 65+. Pillen wins voters with high school educations by a 26-point margin and those who have attended some college by 14 points; Walz wins those with college degrees by 10 points.

On the issues, Walz leads by 11 points among the 36% who say inflation and the cost of living is the most important issue to their vote, and by 44 points among the 10% most focused on healthcare. She also has a nominal 2-point advantage among the 5% of likely voters who say the war in Iran is their top issue. Pillen leads by 54 points among the 14% who say immigration and border security is most important, by 47 points among the 13% who say cutting taxes is their top issue, by 10 points among the 8% who say jobs and economic growth matter the most, and by 25 points among both the 4% who are most focused on crime and public safety and the 4% who say agriculture, farming, and food safety is the most important issue in their votes this year.

Turning to the race for US Senate , independent Dan Osborn, a mechanic and 2024 candidate for Nebraska's other US Senate seat, takes 46% today, while incumbent Republican Pete Ricketts takes 42%. 4% say they will vote for another candidate; 7% are undecided.

Osborn leads by 20 points among women; Ricketts leads by 11 points among men – a 31-point gender gap, roughly twice that in the gubernatorial contest. Osborn leads by an overwhelming 41 points among voters under age 35, 67% to 26%, and by a more modest but still significant 15 points among voters 35 to 49. Ricketts leads by 7 among 50-to-64-year-olds and by 28 among voters 65+.

On the party and ideology front, independent Osborn runs more strongly among the Democratic base than Democrat Walz does in the race for Governor. Osborn leads by 85 points among Democrats, by 89 points among very liberal voters, and by 67 points among somewhat liberal voters. Ricketts, meanwhile, has a 64-point lead among Republicans, 14% of whom vote for Osborn and a solid 73-point lead among very conservative voters – but leads by 46 points among somewhat conservative voters, 24% of whom vote for Osborn – about twice as many as the 13% of somewhat liberal voters who vote for Ricketts. Independents and moderates are squarely behind Osborn, by margins of 51 points and 47 points respectively.

On the issues, some differences from the gubernatorial contest. Osborn leads by 26 points among those who say inflation and the cost of living is most important, by 48 points among those who say healthcare is their top issue, and by 8 points among those who say crime and public safety is most important – an issue where Pillen leads by 25 points. Ricketts leads by 75 points among those who say immigration and border security is their top issue, by 15 points among agriculture voters, and by 8 points among those most-focused on the war in Iran. Support is divided for those focused on jobs and economic growth, where Osborn has a nominal single-point advantage, and those focused on taxes, where Ricketts has the same one-point nominal lead.

In a small sample of NE-02 likely voters, Democrat Denise Powell, a Democratic activist and political consultant, takes 46% of the vote to Republican Brinker Harding's 42%. Harding, a city council member in Omaha, leads by 22 points among men, while Powell leads by 35 points among women ‐ an unusually large 57-point gender gap. The age split seen in the other contests is also present here, with Powell up by 25 points among voters under age 50 and Harding up by 20 among those 50+. 95% of Democrats in the district and 100% of very liberal voters in the district say they will vote for Powell, while Harding's support among his base appears softer – 81% of Republicans and 76% of very conservative voters say they will vote for him. Caution should be used in extrapolating from the small number of likely voters in this contest.

Taking a look at net favorability numbers for these candidates and the President, which are calculated by subtracting those with negative opinions from those with positive opinions, SurveyUSA notes all but one name, Denise Powell, is in negative numbers: +4: Denise Powell. 38% of NE-02 registered voters have favorable opinions of Powell (20% very favorable, 18% somewhat favorable); 34% have unfavorable opinions (11% somewhat unfavorable, 23% very unfavorable). Another 27% say they are not familiar with Powell. -2: Dan Osborn. Osborn is viewed favorably by 43% of registered voters statewide (19% very favorable, 24% somewhat favorable), unfavorably by 45% (15% somewhat unfavorable, 30% very unfavorable). 11% are unfamiliar with him. -8: Brinker Harding. 28% in NE-02 have a favorable opinion (15% very, 13% somewhat); 36% have an unfavorable opinion (23% somewhat, 13% very). Another 36% are not familiar with Harding. -9: Donald Trump. Statewide, 45% have a favorable opinion of the President (31% very, 14% somewhat), and 54% have an unfavorable one (7% somewhat, 47% very). -11: Pete Ricketts. 42% have favorable opinions (19% very, 23% somewhat), 53% unfavorable opinions (15%

Nebraska will hold a general election for Governor, for United States Senate, and for other offices in November. Many people don't have the time to vote in every election.

Thinking ahead to November, are you ... ?

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies, and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone; in some cases, 100% online; and in other cases, a blend of the two. For those projects that are conducted “mixed-mode” (or “multi-mode”): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers, and answering machines. Landline telephone sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent’s cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent’s phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from Aristotle or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. Responses are minimally weighted to U.S. Census or voter file targets for gender, age and race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency, and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. On research completed prior to 12/31/16, SurveyUSA assigned to each question within the instrument a theoretical margin of sampling error. Effective 01/01/17, SurveyUSA assigns to each question within the instrument a credibility interval, which better reflects the sampling uncertainties associated with gathering some percentage of respondent answers using non-probability sample. Though commonly cited in the presentation of research results, “sampling error” is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principles of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
