QUANTUS INSIGHTS

STATEWIDE SURVEY OF LIKELY VOTERS · GENERAL ELECTION

Iowa U.S. Senate Survey

The Hinson–Turek U.S. Senate ballot, 35 days before Election Day.

FIELDED	RESPONDENTS	POPULATION	MARGIN OF ERROR
September 28–29, 2026	738	Likely voters	±3.8

EXECUTIVE BRIEF

Core findings

47.1 – 45.8

Hinson – Turek, U.S. Senate ballot

01

A narrow Hinson edge, inside the margin

Hinson 47.1 percent to Turek 45.8, a 1.3-point edge. The margin of error on the gap between two candidates is about ±7.6, so neither holds a measurable lead.

02

The edge widens slightly head-to-head

Restricting the ballot to the two nominees gives Hinson 48.9 to 46.7, a 2.2-point margin. Pushing undecided voters to a lean moves the full ballot to 48.5 to 46.6.

03

A gender and metro divide

Women favor Turek 52 to 42; men favor Hinson 52 to 40. Urban voters go 58 Turek and suburban voters 48 Turek; rural voters, 41 percent of the sample, go 58 Hinson.

04

Neither nominee is above water

Hinson is 42.9 favorable to 45.3 unfavorable, net -2.4. Turek is 38.9 to 39.0, net -0.1, with 22 percent holding no opinion of him or never having heard of him.

05

Seven percent are not yet with either nominee

5.4 percent are undecided and 1.7 percent choose Thomas Laehn, the Libertarian: 7.1 percent in all, more than five times the gap between the nominees.

METHODOLOGY

How this survey was conducted

POPULATION

The survey represents likely voters in the 2026 Iowa general election. A likely-voter screen was used to define and weight the survey population, drawing on voting history, demographics, partisan-lean indicators and voter-file geography.

UNIVERSE

Active registered Iowa voter-file records. Respondents were contacted through SMS invitations sent to mobile phones. Of 738 completed interviews, 24 respondents (3.3 percent) who said they would not vote were removed from the ballot questions, leaving a voters-only base of 714.

FIELD PERIOD

September 28 to September 29, 2026.

MODE

SMS-to-mobile cell interviews.

SAMPLING

Stratified random sampling from the eligible universe, matched to available contact records.

WEIGHTING

Iterative proportional fitting, or raking, to benchmarks for the Iowa likely general-election electorate on seven dimensions: sex, age range, race and ethnicity (modeled), education (modeled), metro type, media market, and reported party identification. Weights were trimmed to limit the influence of individual respondents and renormalized each iteration.

MARGIN OF ERROR

±3.8 percentage points at the 95 percent confidence level, design-adjusted, for the full sample of 738. The design effect is 1.12, resulting in an effective sample size of approximately 665. Subgroup margins are larger. The margin on the difference between two candidates is roughly twice the single-share margin, about ±7.6. Uncertainty was additionally checked with 400 reraked bootstrap replicates across seven analytical scenarios.

REPORTING

Topline results are shown to one decimal; crosstab cells are whole-number column percentages within each subgroup. Base n is shown on every table. Cells marked † rest on fewer than 80 respondents and are directional only. Party is respondent-reported identification (Democrat, Republican, Independent). Media markets under 30 respondents are combined as Other markets. The conditional follow-up question (Q2) is reported separately, and the full-sample margin of error is not applied to it.

ROUNDING

Percentages may not total 100 due to rounding. Full precision is retained in the underlying results.

For questions or inquiries email contact@quantusinsights.org or visit quantusinsights.org.

Rochester-Mason	3.9	n=29
Ottumwa-Kirksv.	1.2	n=9
Sioux Falls	1.1	n=8
Quincy-Hannibal	0.7	n=5

Party is respondent-reported identification. Counts are the full reporting base of 738; ballot questions use the voters-only base of 714 (24 would-not-vote respondents removed). Weights are raked to the methodology benchmarks.

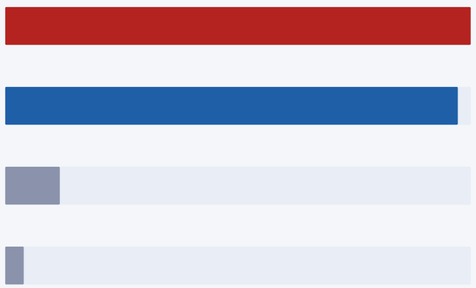

Other markets: in the crosstabs that follow, Rochester-Mason City, Ottumwa-Kirksville, Sioux Falls and Quincy-Hannibal are combined (n=50 on the ballot). Race and ethnicity is modeled from the voter file.

TOPLINE SUMMARY

The ballot at a glance

Responses to the U.S. Senate ballot, in percent of likely voters. Full results and demographic detail follow in the sections behind this page.

Q1 · U.S. SENATE BALLOT · N=714

Ashley Hinson (R)	47.1
Josh Turek (D)	45.8
Undecided	5.4
Thomas Laehn (L)	1.7

Q1–Q3 · BALLOT TREATMENTS · N=714

As asked, all likely voters (Q1)	Hinson +1.3
Two-candidate ballot (Q3)	Hinson +2.2
Full ballot with leaners (Q1 + Q2)	Hinson +1.9
Two-way share, Hinson	50.7
Two-way share, Turek	49.3
Undecided	5.4
Thomas Laehn, Libertarian	1.7

N = 714 likely voters who would vote · September 28–29, 2026 · design-adjusted margin of error ±3.8. Percentages may not total 100 due to rounding. The leaner treatment pushes undecided respondents to a choice; the full-sample margin of error does not apply to that follow-up.

SECTION ONE

The U.S. Senate ballot

The full ballot, the full ballot with undecided voters pushed to a lean, and the two-candidate ballot, each with demographic and media-market detail.

QUESTIONS

Q1 – Q3

STRUCTURE

Topline result, demographic and media-market detail

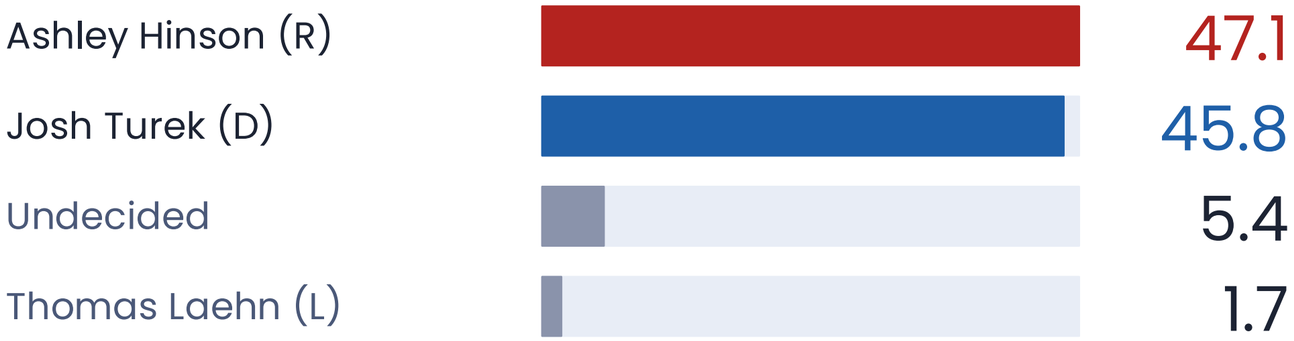

BASES

n = 714 voters-only base; leaner follow-up n = 38

Q1 · U.S. SENATE BALLOT

If the election for U.S. Senate in Iowa were held today, for whom would you vote?

Hinson +1.3
Hinson margin, full sample

TWO-WAY SHARE

1.4 point margin, Hinson, two-way

MARGIN BY GROUP

Women	Turek +10
Men	Hinson +12
Independents	Turek +17
Suburban	Turek +6
Rural	Hinson +22

THE MARGIN

Hinson leads by 1.3 points. The margin on a difference between two candidates is about ±7.6, so the result is a statistical tie.

THE LIBERTARIAN

Thomas Laehn draws 1.7 percent and 5.4 percent are undecided. The 24 respondents who said they would not vote are excluded from the base.

REPORTING NOTE

Column percentages on the voters-only base of 714. Margins computed from unrounded shares.

Rural	58	36	5	294
Town	45	48	2	113

GENDER GAP

Women back Turek by 10 points; men back Hinson by 12.

PARTY

Independents go 53 Turek to 36 Hinson, with 9 percent undecided. Democrats hold at 91 percent and Republicans at 85.

REPORTING NOTE

Whole-number column percentages. Laehn not shown. † = base under 80; race is modeled from the voter file.

Q1 · MEDIA MARKET DETAIL

The Senate ballot by media market.

Q1 · U.S. SENATE BALLOT

	DES MOINES-AMES n=294	CEDAR RAPIDS-WTRLO n=208	DAVENPORT-MOLINE n=65†	SIOUX CITY n=55†	OMAHA n=42†	OTHER MKTS. n=50†
Hinson (R)	45	42	48†	59†	56†	60†
Turek (D)	49	50	46†	32†	36†	32†
Laehn (L)	2	1	2†	1†	2†	4†
Undecided	5	7	4†	7†	7†	3†

THE TWO BIG MARKETS

Des Moines-Ames goes Turek 49 to 45; Cedar Rapids-Waterloo goes Turek 50 to 42. Together they are 70 percent of the sample.

SMALL MARKETS

Davenport is 48 Hinson to 46 Turek; Sioux City goes Hinson 59 to 32 and Omaha 56 to 36, on 42 to 65 respondents. Other markets is n=50.

REPORTING NOTE

Whole-number column percentages within each market. † = base under 80, directional. Other markets is computed from combined respondent counts.

Q1 + Q2 · UNDECIDED VOTERS PUSHED

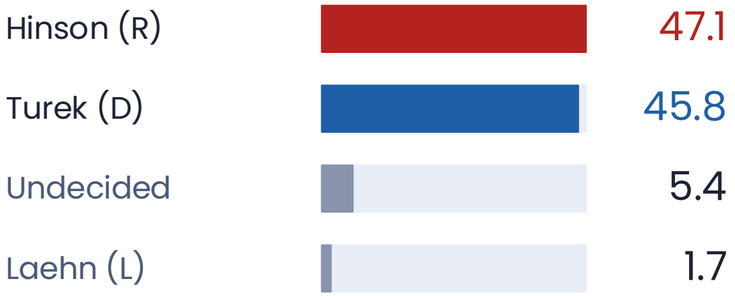

The full ballot as asked and with undecided respondents pushed to a lean.

Hinson +1.9

Hinson margin, firm plus leaners

AS ASKED · ALL LIKELY VOTERS

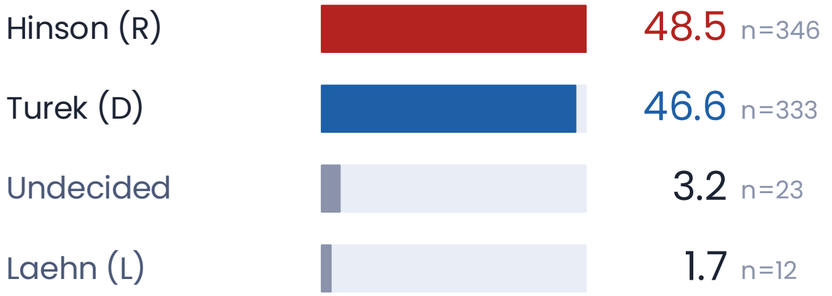

n = 714

MARGIN **Hinson +1.3**

FIRM + LEANERS

Q1 undecided (n=38) asked Q2 · reporting base 714

MARGIN **Hinson +1.9**

HOW THE UNDECIDED BROKE

Of the 38 respondents undecided on Q1, 23.6 percent leaned Hinson (n=9), 14.7 percent leaned Turek (n=6) and 61.7 percent stayed undecided (n=23).

WHAT CHANGES

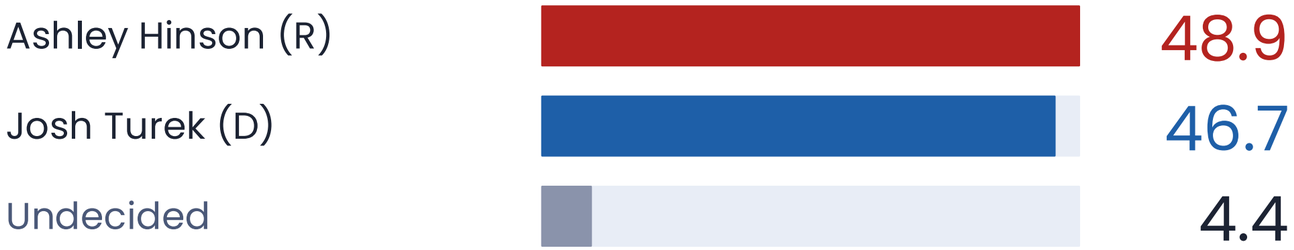

Leaners lift Hinson to 48.5 and Turek to 46.6 and cut undecided to 3.2 percent. The margin moves by 0.6 points.

REPORTING NOTE

The as-asked result is the reported ballot. Q2 is a conditional follow-up on 38 respondents; the full-sample margin of error does not apply to it.

Q3 · TWO-CANDIDATE U.S. SENATE BALLOT

If the election for U.S. Senate were just between the following two candidates, for whom would you vote?

Hinson +2.2

Hinson margin, two-candidate ballot

TWO-WAY SHARE

undecided removed · base 95.6% of respondents

2.3 point margin, Hinson, two-way

MARGIN BY GROUP

Women	Turek +7
Men	Hinson +10
Independents	Turek +15
Suburban	Turek +6
Rural	Hinson +18

THE EDGE WIDENS

Without the Libertarian, Hinson leads 48.9 to 46.7, a 2.2-point margin, inside the roughly ±7.6 margin on a difference.

TWO-WAY SHARE

Removing the 4.4 percent undecided gives Hinson 51.2 to Turek 48.8, a 2.3-point margin on the two-way share.

REPORTING NOTE

Column percentages on the voters-only base of 714. Margins computed from unrounded shares.

THE TWO BIG MARKETS

Des Moines-Ames is even at 48 Turek to 47 Hinson; Cedar Rapids-Waterloo goes Turek 52 to 43.

SMALL MARKETS

Sioux City goes Hinson 70 to 30 and Omaha 58 to 38, on 42 to 57 respondents; Other markets combines three markets under 30 respondents each (n=45).

REPORTING NOTE

Whole-number column percentages within each market. † = base under 80, directional. Other markets is computed from combined respondent counts.

SECTION TWO

Iowa in context

The Senate ballot against the state's regional map, its statewide benchmarks since 2008 and the published polling averages.

QUESTIONS

Q1 in context

STRUCTURE

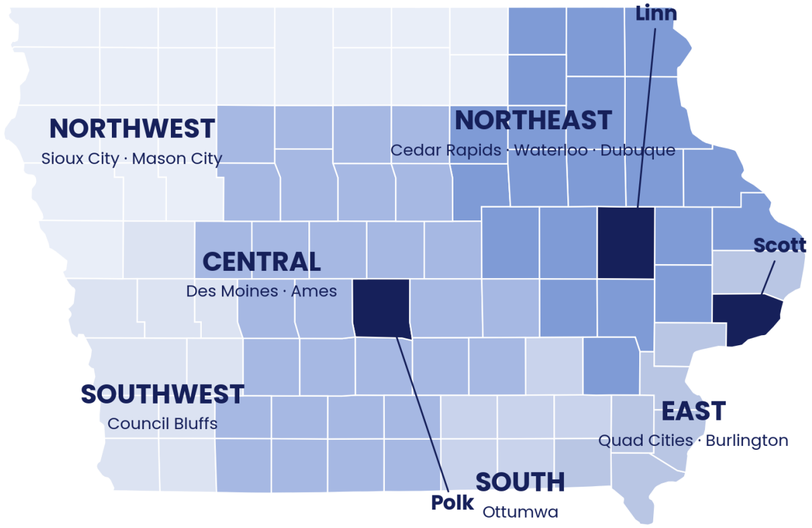

Regional map and statewide benchmarks

BASES

Certified returns, 2008–2024; published polling averages

REGIONAL CONTEXT

Where Iowa's vote comes from

- Northeast · Cedar Rapids, Waterloo
- Central · Des Moines, Ames
- East · Quad Cities, Burlington
- Northwest · Sioux City, Mason City
- Southwest · Council Bluffs
- South · Ottumwa
- Metro counties

Metro counties: Polk (Des Moines), Linn (Cedar Rapids), Scott (Davenport). Regions are analyst groupings of the 99 counties keyed to media markets, not official designations.

PRESIDENTIAL MARGIN, 2008 BASELINE TO TODAY

REGION	SHARE	**2008** LAST D WIN	2020	2024	SHIFT 2008 TO 2024
Statewide	100%	**D +9.5**	**R +8.2**	**R +13.2**	**R +22.7**
Central	37%	**D +7.1**	R +4.0	R +8.6	R +15.7
Northeast	30%	**D +20.8**	D +3.0	R +2.2	R +22.9
Northwest	13%	**R +6.4**	R +33.6	R +39.4	R +32.9
East	11%	**D +15.1**	R +6.5	R +13.8	R +28.9
Southwest	6%	**R +5.6**	R +29.2	R +31.9	R +26.3
South	3%	**D +6.9**	R +28.6	R +35.4	R +42.3
METRO COUNTIES					
Polk	15%	**D +14.6**	D +15.2	D +10.9	R +3.7
Linn	7%	**D +21.5**	D +13.7	D +9.9	R +11.6
Scott	5%	**D +14.5**	D +3.5	R +3.9	R +18.4

2008 is the baseline used across this series; Iowa last voted Democratic for president in 2012. Shift is the change in margin from 2008 to 2024. Share is the region's portion of the 2024 vote; margins aggregated from certified county returns.

THE EASTERN THIRD

The Northeast casts 30 percent of the vote and has moved 23 points toward Republicans since 2008, from D +20.8 to R +2.2. The East, anchored by the Quad Cities, moved 29 points and flipped in 2024.

DES MOINES AND CEDAR RAPIDS

Polk and Linn are the only large units still Democratic, D +10.9 and D +9.9 in 2024, and both moved right, Polk by 3.7 and Linn by 11.6. Scott (Davenport) flipped to R +3.9.

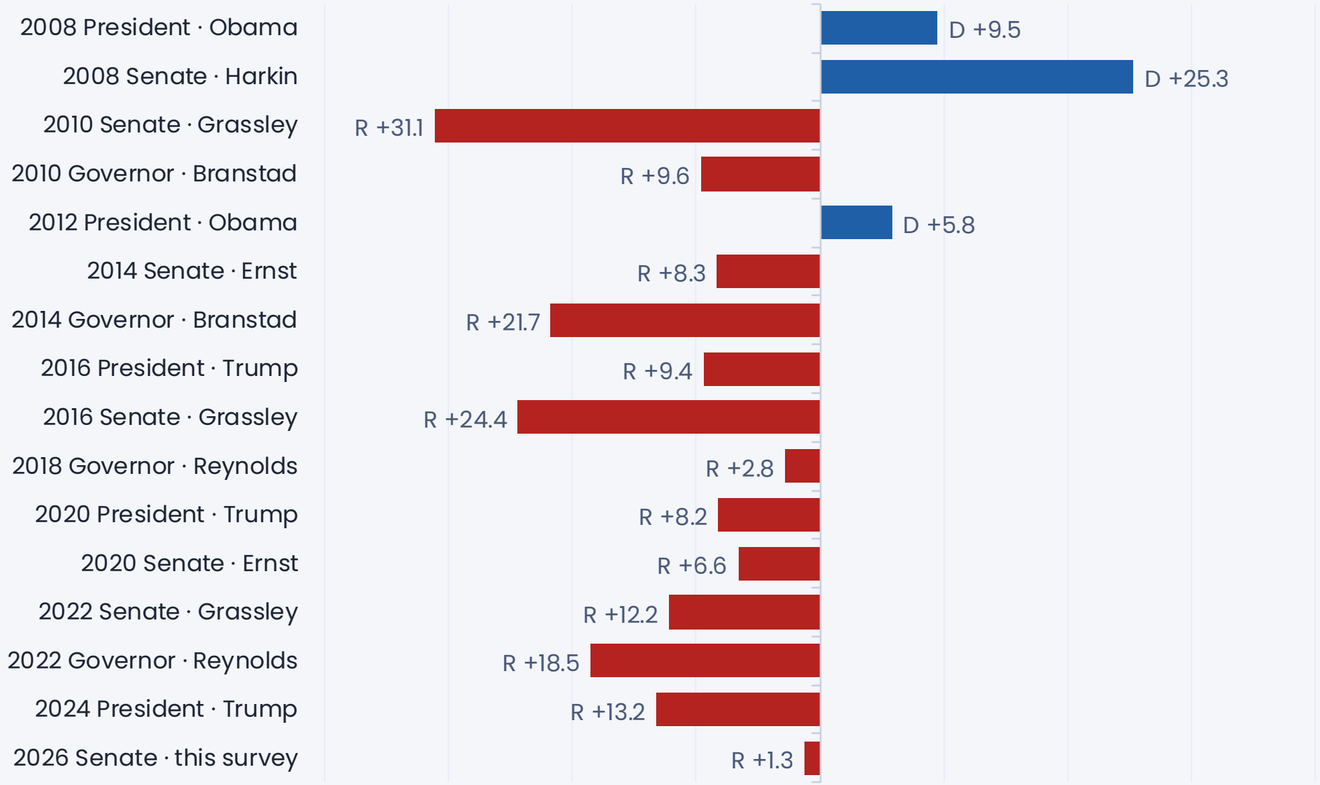

IN THIS SURVEY

Des Moines-Ames goes Turek 49 to 45 and Cedar Rapids-Waterloo 50 to 42; Sioux City and Omaha go Hinson by 27 and 20 points on small bases.

Aggregator averages as updated September 11–29, 2026. Shares in percent; Silver Bulletin publishes a margin only, so the share average uses five sources.

THE BENCHMARK

Iowa has voted Republican for president three times running, by 8 to 13 points, and Republicans have won every Senate and governor race since 2014, by 2.8 to 24.4 points.

THE CANDIDATE RECORD

Hinson won IA-01 by 2.5 in 2020 and IA-02 by 8.3 in 2022 and 15.6 in 2024. Turek holds a Republican-leaning Council Bluffs House seat, won by six votes in 2022 and by 5 points in 2024.

AGAINST THE AVERAGES

Hinson's 47.1 tops every aggregator's 43.6 to 45.2 range; Turek's 45.8 sits inside theirs. Hinson +1.3 against an average of Turek +0.8 is a 2.1-point gap, inside the ±7.6 margin on a difference.

SECTION THREE

Favorability and the 2024 baseline

How likely voters see the two nominees, and how the sample recalls its 2024 presidential vote, each with demographic detail.

QUESTIONS

Q4 – Q6

STRUCTURE

Topline result and demographic detail

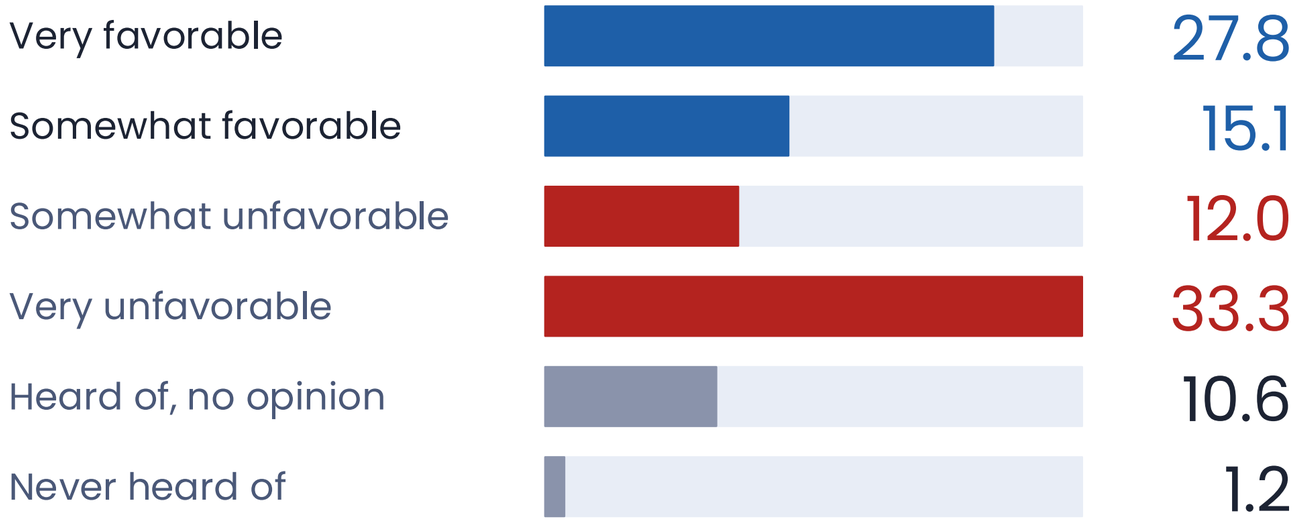

BASES

Q6 · 2024 PRESIDENTIAL VOTE RECALL

In the 2024 election for President, did you vote for Republican Donald Trump, Democrat Kamala Harris, someone else, or did you not vote in that race?

Trump +10.4
Trump margin, recalled 2024 vote

TWO-WAY SHARE, RECALLED

13.2 point margin, Trump, certified 2024 result

RECALLED MARGIN BY GROUP

Women	Trump +3
Men	Trump +18
Independents	Trump +6
Suburban	Trump +1
Rural	Trump +34

THE BASELINE

Respondents recall a 52.5 to 42.1 Trump vote, a 10.4-point margin. Iowa's certified 2024 result was Trump 55.7 to Harris 42.5, a 13.2-point margin.

WHAT IT MEANS

The sample recalls a margin 2.8 points narrower than the certified result. Hinson's ballot edge does not rest on an over-Republican sample.

REPORTING NOTE

Column percentages on the voters-only base of 714. Certified result from the Iowa Secretary of State; recall responses typically understate the winner's margin.

Q6 · DEMOGRAPHIC DETAIL

In the 2024 election for President, did you vote for Republican Donald Trump, Democrat Kamala Harris, someone else, did you not vote in that race, or are you unsure?

GENDER GAP

Men recall Trump by 18 points; women by 3.

PARTY

Republicans recall Trump 89 to 6; Democrats recall Harris 89 to 6. Independents recall Trump 49 to 43.

REPORTING NOTE

Whole-number column percentages. Neither combines did not vote and someone else. † = base under 80; race is modeled from the voter file.

BASES AND MARGIN OF ERROR

What each number can carry.

ANALYSIS BASE	95% MARGIN OF ERROR	REPORTABLE
738 full study	±3.8 pts	Yes
300 to 400	±5.2 to ±6.0 pts	Yes
150 to 250	±6.6 to ±8.5 pts	Yes, with base
80 to 149	±8.5 to ±11.6 pts	Directional
Under 80	wider than ±11.7 pts	Transparency only

Margins are calculated at the 95 percent confidence level for an estimate near 50 percent and include the survey design effect of 1.12. Subgroups marked † should be interpreted as directional. The conditional follow-up question (Q2) does not use the full-sample margin of error.

QUESTION BASES

Q1 · U.S. Senate ballot	**n=714**
Q2 · Forced lean, Q1 undecided	**n=38**
Q3 · Two-candidate U.S. Senate ballot	**n=714**
Q4 – Q6 · Favorability and 2024 recall	**n=714**

SMALL BASES IN THIS WAVE

18–29 Age	n=73
Graduate school Education	n=78
Unknown Education	n=69
Davenport-Moline Media market	n=65
Sioux City Media market	n=55
Omaha Media market	n=42
Other markets (combined) Four media markets under 30 respondents each	n=50
Q2 · forced lean Conditional follow-up	n=38
Black Race / ethnicity (modeled)	n=19
Hispanic Race / ethnicity (modeled)	n=18
Other Race / ethnicity (modeled)	n=13
Asian Race / ethnicity (modeled)	n=6

QUESTION BASES

The Senate ballots, the favorability questions and the recall question were all asked of the voters-only base of 714 likely voters.

DIFFERENCES

The margin on a difference between two candidates is roughly ±7.6 points; a lead inside it is an edge, not decisive.

REPORTING NOTE

Design effect 1.12; effective sample size 665.

AT A GLANCE

The headline figures

Quantus Insights

Hinson +1.3

U.S. Senate ballot, full sample

Hinson +2.2

U.S. Senate ballot, two candidates

Turek +10

Ballot margin among women

Hinson +12

Ballot margin among men

Turek +23

Ballot margin among urban voters

Hinson +22

Ballot margin among rural voters

Turek +6

Ballot margin among suburban voters

A NARROW EDGE

Hinson leads by 1.3 as asked and 2.2 head to head, inside the roughly ±7.6 margin on a difference. She holds men, rural voters and voters 45 and over; Turek holds women, urban and suburban voters and independents.

WHERE IT IS DECIDED

Independents, 24 percent of the sample, back Turek 53 to 36 with 9 percent undecided, the largest undecided pool of any party group. 22 percent of the electorate has no view of Turek.

REPORTING NOTE

Margins are computed from unrounded topline shares and may differ by a tenth from the rounded figures shown.
