Topline results: every question at a glance

TOPLINE SUMMARY · 1 OF 1 · FINAL RESULTS

Selected results as a percentage of those answering each question. Response counts appear with each question. Detailed results follow.

Q1 · SENATE BALLOT · N=733

If the election for U.S. Senate were held today, for whom would you vote?

Ashley Moody, Republican	50.1%
Angie Nixon, Democrat	42.7%
Undecided	4.0%
Would not vote in this race	1.7%
Someone else	1.5%

Q2 · LEANER TEST · N=34

Even if you have not made up your mind, as of today do you lean more toward Ashley Moody or Angie Nixon?

No lean recorded	57.6%
Do not lean toward any candidate	23.5%
Lean toward Ashley Moody	8.6%
Lean toward Angie Nixon	6.6%
Lean toward someone else	3.6%

Q3 · VOTE CERTAINTY · N=733

Have you definitely decided to support that candidate, or could you still change your mind?

Definitely decided	90.4%
Could change my mind	5.8%
Not sure	3.7%

Q4 · TRUMP JOB APPROVAL · N=733

Do you approve or disapprove of the job Donald Trump is doing as president?

Strongly disapprove	46.1%
Strongly approve	35.3%
Somewhat approve	13.7%
Somewhat disapprove	2.8%
Not sure	2.1%

Q5 · MOODY FAVORABILITY · N=733

Do you have a favorable or unfavorable opinion of Ashley Moody?

Very favorable	41.5%
Very unfavorable	25.6%
Somewhat favorable	12.8%
Heard of, but no opinion	11.0%
Have not heard of this person	4.8%
Somewhat unfavorable	4.3%

Q6 · NIXON FAVORABILITY · N=733

Do you have a favorable or unfavorable opinion of Angie Nixon?

Very unfavorable	30.8%
Very favorable	29.1%
Somewhat favorable	13.9%
Heard of, but no opinion	12.4%
Have not heard of this person	11.8%
Somewhat unfavorable	1.9%

Q7 · PARTY IDENTIFICATION · N=733

Generally speaking, do you consider yourself a Republican, a Democrat, an independent, or something else?

Republican	37.4%
Democrat	19.6%
Independent - Lean Democrat	14.1%
Independent - Unaffiliated	16.1%
Independent - Lean Republican	9.4%
Something else	3.4%

Q1. Senate Ballot

If the election for U.S. Senate were held today, for whom would you vote?

Base 733 · margin of error approximately ±4.1% · crosstabs 1 of 3

METHODOLOGY

How the survey was conducted

Likely voters in the study geography | Field dates: September 8-10, 2026

RESPONDENTS	EFFECTIVE N	DESIGN EFFECT	MARGIN OF ERROR
733	582	1.26	±4.1%

POPULATION AND WEIGHTING

Quantus Insights analyzed 733 completed interviews representing likely voters in the study geography. Respondents were contacted through SMS invitations sent to mobile phones. The voter file served as the sampling frame, and results were weighted using iterative proportional fitting (raking) to supported population benchmarks for Age range, Sex, Education (modeled), Metro type, Race / ethnicity (reported), Party ID (reported), General vote frequency.

WEIGHTS AND UNCERTAINTY

Weights were trimmed to the approved 0.2× to 5.0× range and normalized before reporting. The reported design effect was 1.26, producing an effective sample size of 582 and an approximate 95% margin of error of ±4.1 percentage points for full-sample estimates near 50%.

REVIEW AND REPORTING

The analysis reviewed respondent integrity, item nonresponse, weighting fit, modeled-label reliability, turnout history, response bias, and estimate sensitivity. Uncertainty estimates used 400 reraked bootstrap replicates across 7 analytical scenarios. Each question uses its own available-response base. Blank or skipped answers are excluded from that question.

Percentages may not total 100% due to rounding. Bases below 30 are marked with an asterisk and are directional.
