**Days Before Votes Are Counted, Minnesota Voters Boost DFL Candidates For Clean Sweep of Governor, US Senate, AG, SoS, and Auditor Races:**

SurveyUSA's final 2026 tracking poll for KSTP-TV Minneapolis, KAAL-TV Rochester, and WDIO-TV Duluth shows DFL candidates winning each of the five statewide contests being polled, with movement towards each DFL candidate and away from each Republican candidate from our last poll , released just over two weeks ago.

DFL candidate Amy Klobuchar gains 3 points and Republican Lisa Demuth loses 2 points in the race to replace Tim Walz as Governor , with Klobuchar finishing 12 points atop Demuth, 51% to 39%. That's up from a 7-point lead in the previous two polls, but narrower than the 16 points she led by following the primaries in August. Green Party candidate Steven Young remains at 3%; undecided voters hold steady at 8%. Each major candidate remains well ahead with their base: Demuth leads by 84 points among Republicans and by 73 points among Conservatives, while Klobuchar leads by 88 points among both Democrats and liberals. Klobuchar has widened her lead among independent voters , where she today leads by 16 points, up from 3 points two weeks ago. Demuth, meantime, has pulled ahead among voters age 65+ , where she previously had trailed by margins of 6 (August), 5 (September) and 3 (mid-October) points. Demuth has also pulled ahead among voters who attended some college , where she previously had trailed by 5, 8, and 6-point margins.

The race to replace Tina Smith in the US Senate has been tighter; DFL candidate Peggy Flanagan has led Republican Michele Tafoya by margins of 5 points (August) and 3 points (two weeks ago), and the race was tied in September – but today Flanagan steps into a 7-point lead, climbing 3 points as Tafoya falls back 1, leaving the race at Flanagan 48%, Tafoya 41%. Two other candidates, Libertarian Rebecca Whiting and independent Marisa Simonetti, each continue to take 2% of the vote, while 7% of likely voters say they are undecided. Tafoya has never trailed among men , though her lead there has fallen from 6, 8, and 5 points to 3 points today, but Flanagan has widened her own lead among women from 8 points in September to 11 points two weeks ago to 19 points today. Tafoya, meantime, climbs among voters 65+ , where she led by 2 points in September, 8 points in mid-October, and now leads by 14. Those who have already cast their ballots – 20% of the electorate – give Flanagan a 28-point advantage, while those who say they definitely will vote – 65% of all likely voters – prefer Flanagan by a narrower 5-point margin. Tafoya leads by 6 points among the 15% of likely voters who say they will probably vote.

DFL incumbent Attorney General Keith Ellison is at 49% in his re-election bid today, Republican Ron Schutz at 41%, with 10% undecided. That's Ellison's best showing in 7 tracking polls between June and today, and Schutz's worst showing since he climbed into a 43% tie with Ellison in late August. Schutz has never polled above 45%, which he reached in September; Ellison reached 45% for the first time in mid-October, and exceeds it for the first time today. Ellison has eaten into Schutz's lead among men , where Schutz led by 10 points two weeks ago but today leads by just 2, while widening his own lead among women , where he today leads by 18 points, up from 12 points two weeks ago and 5 points in September.

Incumbent DFL Secretary of State Steve Simon gains some ground in his own re-election fight, taking 47% of the vote today against Republican Tad Jude at 36%, Green Party candidate Seth Kuhl-Stennes at 2%, and Libertarian George "Chip" Tangen at 4%. 11% are undecided in this contest. Simon has increased his lead from 4 points in September to 6 points in mid-October to 11 points today, while Jude has received 36% or 37% of the vote in each poll.

Finally, in the election for State Auditor , DFL candidate Zack Filipovich leads Republican Scott Jensen 45% to 39% today, with 4% saying they will vote for Forward Independence candidate Jay Reeves and 12% undecided. Two weeks ago , Filipovich led by a nominal single point; in September, Jensen had the lead, 43% to 36%. Jensen increases his poll-on-poll lead slightly among men , from 7 points to 8, while Filipovich doubles his lead among women from 9 points to 18 points, creating a 26-point gender gap – the largest across the five contests.

Given a list of 12 issues and asked which will be most important to their votes this year, 39% say inflation/the cost of living/gas prices is most important, up from 36% in the last poll; 17% say it's fraud, down from 18%; 9% say health care, down from 11%; 7% say immigration, unchanged. Each of the other issues is at 4% or lower. Voters who identify inflation and the cost of living as their top issue vote for the DFL candidate in each race, by margins of between 31 and 40 points. Those who say health care is most important also vote DFL, by 40 to 46-point margins. Fraud voters vote for Republicans by 61 to 76-point margins, as do those most focused on immigration, who do so by margins of between 60 and 71 points.

**Statement of Methodology:** SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies, and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone; in some cases, 100% online; and in other cases, a blend of the two. For those projects that are conducted "mixed-mode" (or "multi-mode"): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers, and answering machines. Landline telephone sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent's cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent's phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from Aristotle or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. Responses are minimally weighted to U.S. Census or voter file targets for gender, age and race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency, and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. On research completed prior to 12/31/16, SurveyUSA assigned to each question within the instrument a theoretical margin of sampling error. Effective 01/01/17, SurveyUSA assigns to each question within the instrument a credibility interval, which better reflects the sampling uncertainties associated with gathering some percentage of respondent answers using non-probability sample. Though commonly cited in the presentation of research results, "sampling error" is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principles of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
