Survey Notes

These results are from a Saint Anselm College Survey Center poll of 1042 likely New Hampshire voters conducted September 28 - 29, 2026, using a text-to-web methodology.

Respondents were selected using a stratified sampling design based on the demographic and geographic characteristics of the New Hampshire electorate. Sampling targets for gender, age, education, party affiliation, and geography were developed using 2022 general election data from the New Hampshire Secretary of State, U.S. Census Bureau American Community Survey (ACS), national election exit polling, and Data Trust voter registration data.

Candidates and parties were rotated for the ballot tests in both the questions and the choices. Questions in each of the series were presented in random order.

Following data collection, responses were weighted by gender, age, education, party affiliation, and geography to reflect the expected composition of the New Hampshire general election electorate. The weighting model incorporates data from the 2022 and 2024 general elections and draws upon data from the New Hampshire Secretary of State, U.S. Census Bureau American Community Survey (ACS), national election exit polling, and Data Trust voter registration data.

The margin of sampling error for the full sample of 1042 likely voters is ± 3.0 percentage points with a confidence interval of 95%. The margin of error for the questions presented only to respondents aged 50 and older is ± 3.7 percentage points. The margin of error is larger for demographic and other subgroups. Results may also be subject to non-sampling sources of error inherent in public opinion research.

The Saint Anselm College Survey Center (SACSC) was founded in the wake of the 2016 election, and launched its first poll in February 2018 as the midterm elections were getting underway. Housed within the New Hampshire Institute of Politics at Saint Anselm College, the Center conducts quarterly polls of New Hampshire voter attitudes and additional polls as circumstances warrant. This research supports the academic mission of the College, and provides students with a practical education in survey techniques while providing the public at large with insight into political opinion trends that impact the state's federal and gubernatorial elections. To support its operations, the Center performs commissioned research on behalf of nonprofit organizations and corporations.
