QUANTUS INSIGHTS

STATEWIDE SURVEY OF LIKELY VOTERS · GENERAL ELECTION

Alaska U.S. Senate Survey

The Sullivan–Peltola U.S. Senate ballot, 34 days before Election Day.

FIELDED	RESPONDENTS	POPULATION	MARGIN OF ERROR
September 28–30, 2026	758	Likely voters	±4.0

EXECUTIVE BRIEF

Core findings

46.1 – 45.5
Sullivan – Peltola, U.S. Senate ballot

01

A Sullivan edge too small to read

Sullivan 46.1 percent to Peltola 45.5, a 0.6-point edge. The margin of error on the gap between two candidates is about ±8.0, so neither holds a measurable lead.

02

Every ballot treatment lands within a point

Restricting the ballot to the two nominees gives Sullivan 46.5 to 46.2, a 0.3-point margin. Pushing undecided voters to a lean moves the full ballot to 46.8 to 46.5 and the two-candidate ballot to 47.8 to 47.2.

03

A gender and metro divide

Women favor Peltola 52 to 40; men favor Sullivan 52 to 41. Urban voters go 58 Peltola and suburban voters 56 Peltola; rural voters, 47 percent of the sample, go 57 Sullivan.

04

Peltola is above water; Sullivan is not

Sullivan is 43.4 favorable to 46.6 unfavorable, net -3.2. Peltola is 47.9 to 43.3, net +4.6. Both are fully defined: one in ten has no view of either, and two-thirds hold a strong view of each.

05

Eight percent are not yet with either nominee

5.0 percent are undecided, 1.6 percent choose Daniel J. Sullivan Jr. and 1.3 percent Gerald L. Heikes, the other Republicans on the ballot: 8.3 percent in all, more than ten times the gap between the nominees.

METHODOLOGY

How this survey was conducted

POPULATION

The survey represents likely voters in the 2026 Alaska general election. A likely-voter screen was used to define and weight the survey population, drawing on voting history, demographics, partisan-lean indicators and voter-file geography.

UNIVERSE

Active registered Alaska voter-file records. Respondents were contacted through SMS invitations sent to mobile phones. Of 758 completed interviews, 21 respondents (2.8 percent) who said they would not vote were removed from the ballot questions, leaving a voters-only base of 737.

FIELD PERIOD

September 28 to September 30, 2026.

MODE

SMS-to-mobile cell interviews.

SAMPLING

Stratified random sampling from the eligible universe, matched to available contact records.

WEIGHTING

Iterative proportional fitting, or raking, to benchmarks for the Alaska likely general-election electorate on seven dimensions: sex, age range, race and ethnicity (modeled), education (modeled), metro type, media market, and reported party identification. Weights were trimmed to limit the influence of individual respondents and renormalized each iteration.

MARGIN OF ERROR

±4.0 percentage points at the 95 percent confidence level, design-adjusted, for the full sample of 758. The design effect is 1.25, resulting in an effective sample size of approximately 607. Subgroup margins are larger. The margin on the difference between two candidates is roughly twice the single-share margin, about ±8.0. Uncertainty was additionally checked with 400 reraked bootstrap replicates across seven analytical scenarios.

REPORTING

Topline results are shown to one decimal; crosstab cells are whole-number column percentages within each subgroup. Base n is shown on every table. Cells marked † rest on fewer than 80 respondents and are directional only. Party is respondent-reported identification (Unaffiliated, Republican, Democrat). The conditional follow-up questions (Q2 and Q4) are reported separately, and the full-sample margin of error is not applied to them.

ROUNDING

Percentages may not total 100 due to rounding. Full precision is retained in the underlying results.

For questions or inquiries email contact@quantusinsights.org or visit quantusinsights.org.

Juneau	6.3	n=48

Party is reported voter file identification. Counts are the full reporting base of 758; ballot questions use the voters-only base of 737 (21 would-not-vote respondents removed). Weights are raked to the methodology benchmarks.

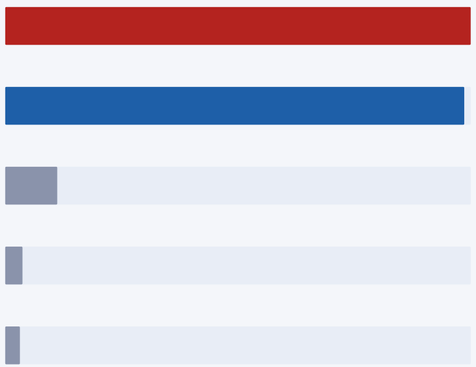

Race and ethnicity and education are modeled from the voter file. Juneau (n=48) and Town (n=63) rest on fewer than 80 respondents in the crosstabs that follow and are directional.

TOPLINE SUMMARY

The ballot at a glance

Responses to the U.S. Senate ballot, in percent of likely voters. Full results and demographic detail follow in the sections behind this page.

Q1 · U.S. SENATE BALLOT · N=737

Dan S. Sullivan (R)	46.1
Mary Peltola (D)	45.5
Undecided	5.0
Daniel J. Sullivan Jr. (R)	1.6
Gerald L. Heikes (R)	1.3

Q1–Q4 · BALLOT TREATMENTS · N=737

As asked, all likely voters (Q1)	Sullivan +0.6
Two-candidate ballot (Q3)	Sullivan +0.3
Full ballot with leaners (Q1 + Q2)	Sullivan +0.3
Two-candidate with leaners (Q3+Q4)	Sullivan +0.6
Two-way share, Sullivan	50.3
Two-way share, Peltola	49.7
Undecided	5.0

N = 737 likely voters who would vote · September 28–30, 2026 · design-adjusted margin of error ±4.0. Percentages may not total 100 due to rounding; 0.4 percent chose someone else. The leaner treatments push undecided respondents to a choice; the full-sample margin of error does not apply to those follow-ups.

SECTION ONE

The U.S. Senate ballot

The full ballot, the full ballot with undecided voters pushed to a lean, and the two-candidate ballot with and without leaners, each with demographic and media-market detail.

QUESTIONS

Q1 – Q4

STRUCTURE

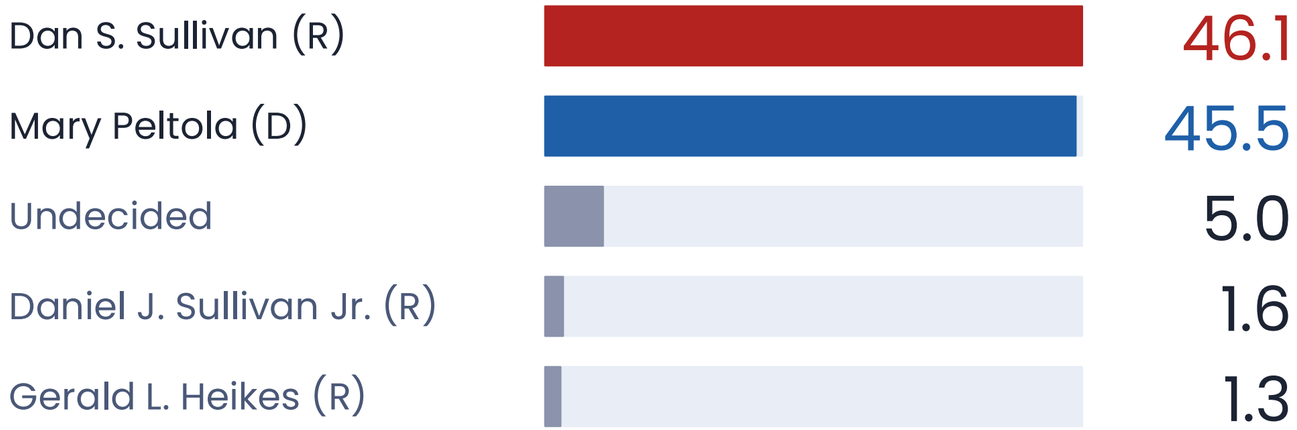

Topline result, demographic and media-market detail

BASES

n = 737 voters-only base; leaner follow-ups n = 37 and n = 35

Q1 · U.S. SENATE BALLOT

If the election for U.S. Senate in Alaska were held today, whom would you choose as your first-choice candidate?

Sullivan +0.6

Sullivan margin, full sample

TWO-WAY SHARE

0.7 point margin, Sullivan, two-way

MARGIN BY GROUP

Women	Peltola +12
Men	Sullivan +11
Unaffiliated	Peltola +22
Suburban	Peltola +17
Rural	Sullivan +21

THE MARGIN

Sullivan leads by 0.6 points. The margin on a difference between two candidates is about ±8.0, so the result is a statistical tie.

THE OTHER REPUBLICANS

Daniel J. Sullivan Jr. draws 1.6 percent and Gerald L. Heikes 1.3; 5.0 percent are undecided. The 21 respondents who said they would not vote are excluded from the base.

REPORTING NOTE

Column percentages on the voters-only base of 737. Margins computed from unrounded shares. Alaska uses ranked-choice voting; Q1 measures the first choice.

Q1 · DEMOGRAPHIC DETAIL

If the election for U.S. Senate in Alaska were held today, whom would you choose as your first-choice candidate?

Suburban	39	56	0	231

GENDER GAP

Women back Peltola by 12 points; men back Sullivan by 11.

PARTY

Unaffiliated voters go 56 Peltola to 34 Sullivan, 5 percent undecided. Democrats hold at 94 percent, Republicans at 87.

REPORTING NOTE

Whole-number column percentages. Daniel J. Sullivan Jr. and Heikes not shown. † = base under 80; race is modeled from the voter file.

Q1 · MEDIA MARKET DETAIL

The Senate ballot by media market.

Q1 · U.S. SENATE BALLOT

	ANCHORAGE n=575	FAIRBANKS n=116	JUNEAU n=46†
Sullivan (R)	47	46	35†
Peltola (D)	45	44	54†
Daniel J. Sullivan Jr. (R)	2	1	3†
Gerald L. Heikes (R)	1	2	2†
Undecided	5	7	5†

ANCHORAGE AND FAIRBANKS

Anchorage, 78 percent of the sample, goes Sullivan 47 to 45. Fairbanks goes Sullivan 46 to 44 with 7 percent undecided.

JUNEAU

Juneau goes Peltola 54 to 35 on 46 respondents; directional only. The two smaller markets are a fifth of the sample.

REPORTING NOTE

Whole-number column percentages within each market. † = base under 80, directional. Someone else (0.4 percent) not shown.

Q1 + Q2 · UNDECIDED VOTERS PUSHED

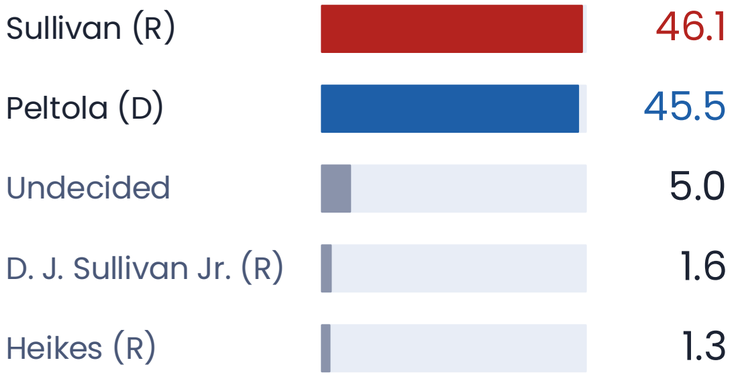

The full ballot as asked and with undecided respondents pushed to a lean.

Sullivan +0.3

Sullivan margin, firm plus leaners

AS ASKED · ALL LIKELY VOTERS

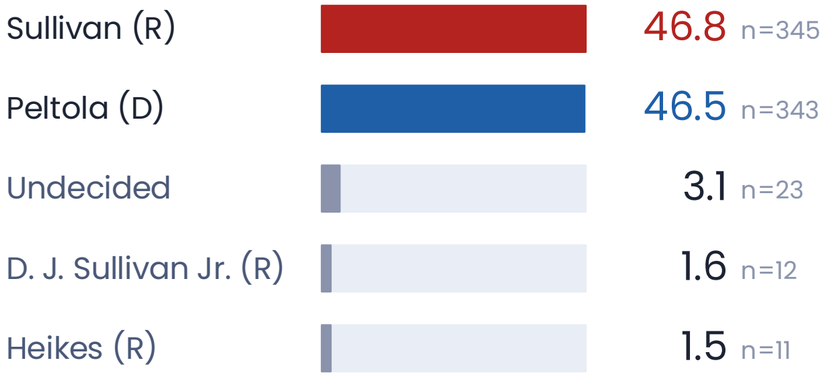

n = 737

MARGIN **Sullivan +0.6**

FIRM + LEANERS

Q1 undecided (n=37) asked Q2 · reporting base 737

MARGIN **Sullivan +0.3**

HOW THE UNDECIDED BROKE

Of the 37 undecided on Q1, 16.0 percent leaned Sullivan (n=6), 19.6 percent Peltola (n=7) and 2.8 percent Heikes (n=1); 61.6 percent stayed undecided (n=23).

WHAT CHANGES

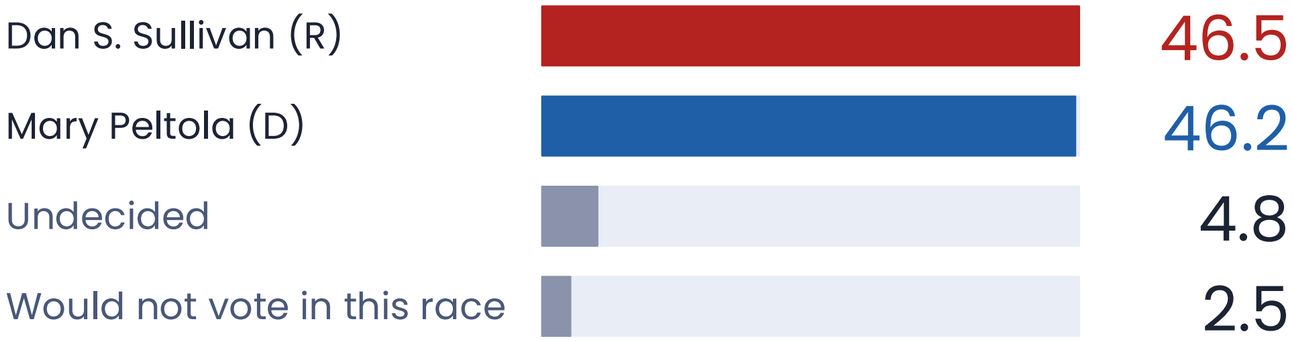

Leaners lift Sullivan to 46.8 and Peltola to 46.5 and cut undecided to 3.1 percent. The margin narrows by 0.3 points, from 0.6 to 0.3.

REPORTING NOTE

The as-asked result is the reported ballot. Q2 is a conditional follow-up on 37 respondents; the full-sample margin of error does not apply to it.

Q3 · TWO-CANDIDATE U.S. SENATE BALLOT

If the election for U.S. Senate were just between the following two candidates, for whom would you vote?

Sullivan +0.3

Sullivan margin, two-candidate ballot

TWO-WAY SHARE

undecided and would-not-vote removed · base 92.7%

0.3 point margin, Sullivan, two-way

MARGIN BY GROUP

Women	Peltola +11
Men	Sullivan +10
Unaffiliated	Peltola +25
Suburban	Peltola +12
Rural	Sullivan +8

HEAD TO HEAD

Between the two nominees alone, Sullivan leads 46.5 to 46.2, a 0.3-point margin, inside the ±8.0 margin on a difference. 4.8 percent are undecided; 2.5 percent would not vote.

WITH LEANERS

Pushing the 35 undecided respondents to a lean (Q4) moves the ballot to Sullivan 47.8, Peltola 47.2, a 0.6-point margin: 9 leaned Sullivan, 7 Peltola and 19 stayed undecided.

REPORTING NOTE

Column percentages on the voters-only base of 737. Margins computed from unrounded shares. Q4 is a conditional follow-up outside the full-sample margin.

Q3 · DEMOGRAPHIC DETAIL

ANCHORAGE AND FAIRBANKS

Head to head, Anchorage is Sullivan 47 to 45 and Fairbanks Sullivan 50 to 47, both inside the margin.

JUNEAU

Juneau goes Peltola 55 to 37 on 47 respondents, with 8 percent saying they would not vote; directional only.

REPORTING NOTE

Whole-number column percentages within each market. † = base under 80, directional.

SECTION TWO

Alaska in context

The Senate ballot against the state’s regional map, its statewide benchmarks since 2008 and the published polling averages.

QUESTIONS

Q1 in context

STRUCTURE

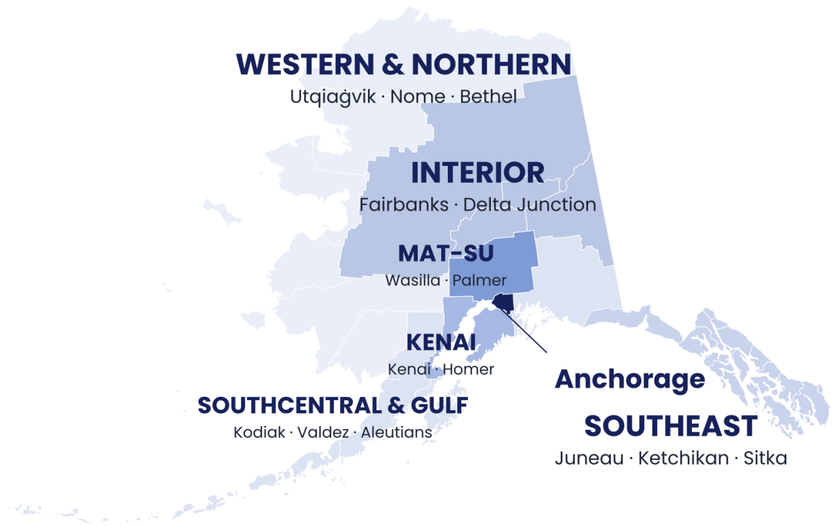

Regional map and statewide benchmarks

BASES

Certified returns, 2008–2024; published polling averages

REGIONAL CONTEXT

Where Alaska's vote comes from

- Anchorage · the municipality
- Mat-Su · Wasilla, Palmer
- Kenai Peninsula · Kenai, Homer
- Interior · Fairbanks, Delta Jct.
- Southeast · Juneau, Ketchikan
- Southcentral & Gulf · Kodiak
- Western & Northern · Nome, Bethel

Rural & coastal combines Southcentral & Gulf with Western & Northern. Regions are analyst groupings of the 30 boroughs and census areas keyed to the media markets, not official designations.

PRESIDENTIAL MARGIN, 2008 BASELINE TO TODAY

REGION	SHARE	**2008** BASELINE	2020	2024	SHIFT 2008 TO 2024
Statewide	100%	**R +21.5**	**R +10.1**	**R +13.1**	**D +8.3**
Anchorage	39%	**R +16.0**	D +2.2	D +1.4	D +17.4
Mat-Su	16%	**R +51.6**	R +47.9	R +48.4	D +3.2
Interior	15%	**R +26.5**	R +15.8	R +19.4	D +7.1
Southeast	11%	**D +1.7**	D +9.4	D +9.5	D +7.7
Kenai Peninsula	10%	**R +37.6**	R +31.8	R +34.5	D +3.1
Rural & coastal	8%	**R +12.8**	D +2.6	R +7.4	D +5.4
WITHIN THE REGIONS					
Fairbanks N. Star	13%	**R +25.7**	R +15.0	R +17.9	D +7.8
Western & Northern	4%	**D +0.6**	D +19.3	D +4.9	D +4.3
Southcentral & Gulf	4%	**R +28.9**	R +16.6	R +19.8	D +9.1

2008 is the baseline used across this series; Alaska has not voted Democratic for president since 1964. Shift is the change in margin from 2008 to 2024. Share is the region's portion of the 2024 vote; margins aggregated from precinct-based borough estimates.

ANCHORAGE

Anchorage casts 39 percent of the vote and has moved 17 points toward Democrats since 2008, from R +16.0 to D +1.4, flipping in 2020. Southeast, 11 percent of the vote, is D +9.5.

MAT-SU, KENAI AND THE INTERIOR

Mat-Su and Kenai, a quarter of the vote, remain R +48 and R +35 and have barely moved. The Interior is R +19.4; the rural Native Western & Northern region fell from D +19.3 to D +4.9.

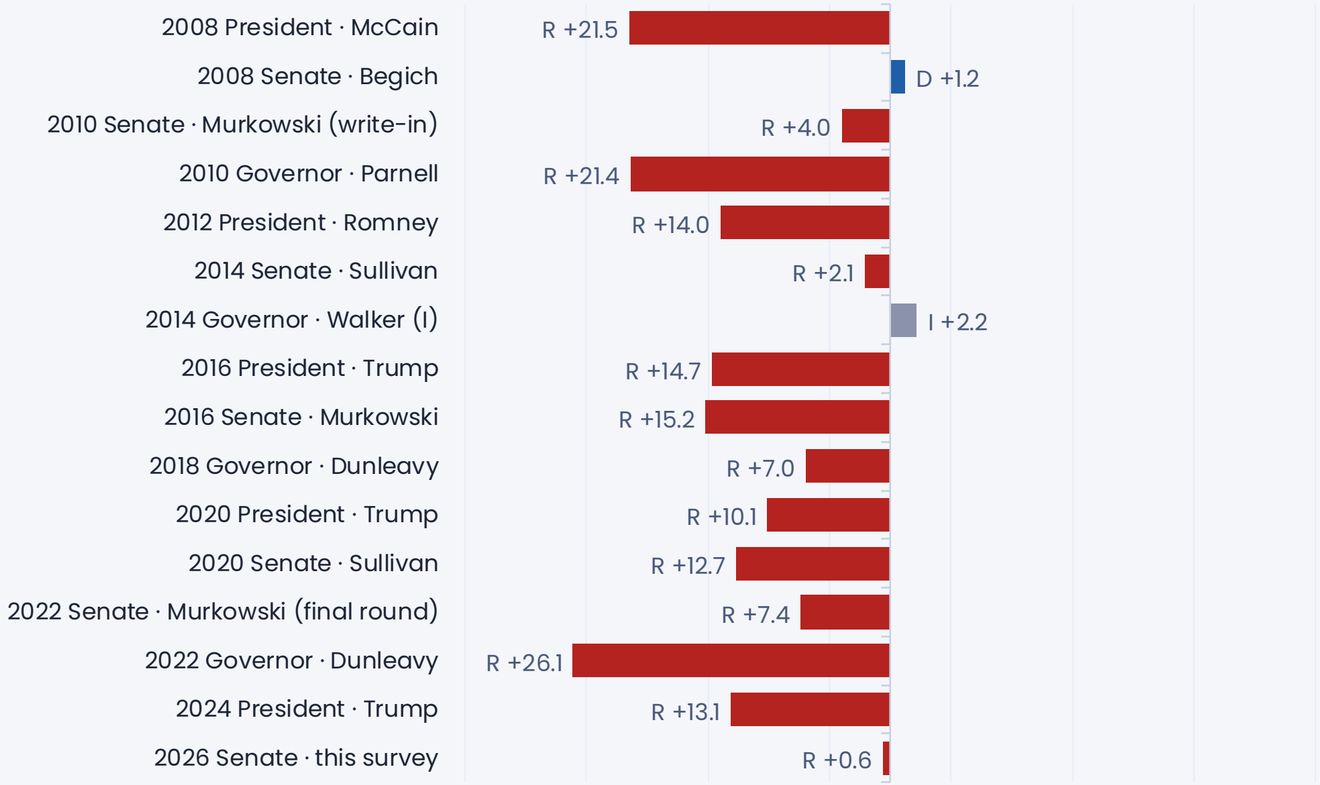

IN THIS SURVEY

Anchorage, 78 percent of the sample, goes Sullivan 47 to 45 and Fairbanks 46 to 44; Juneau goes Peltola 54 to 35 on a small base. Rural respondents go Sullivan 57 to 36.

Aggregator averages as updated September 17 – October 1, 2026. Shares in percent; Silver Bulletin publishes a margin only, so the share average uses five sources. Alaska uses ranked-choice voting, and some averages mix first-choice and simulated final-round results.

THE BENCHMARK

Alaska has voted Republican for president in every election since 1968, by 10 to 22 points since 2008, but its Senate races run closer: Begich won in 2008 by 1.2 and Sullivan unseated him in 2014 by 2.1.

THE CANDIDATE RECORD

Sullivan won by 2.1 in 2014 and 12.7 in 2020. Peltola won the at-large House seat in 2022, by 3.0 in the special and 9.9 in November, and lost it in 2024 to Nick Begich by 2.4 in the final round.

AGAINST THE AVERAGES

Sullivan's 46.1 is inside the aggregators' 45.0 to 48.3 range; Peltola's 45.5 is below their 46.5 to 50.3. Sullivan +0.6 against Peltola +2.4 is a 3.0-point gap, inside the ±8.0 margin on a difference.

SECTION THREE

Favorability and the 2024 baseline

How likely voters see the two nominees, and how the sample recalls its 2024 presidential vote, each with demographic detail.

QUESTIONS

Q5 – Q7

STRUCTURE

Topline result and demographic detail

Q7 · 2024 PRESIDENTIAL VOTE RECALL

In the 2024 election for President, did you vote for Republican Donald Trump, Democrat Kamala Harris, someone else, did you not vote in that race, or are you unsure?

Trump +10.9
Trump margin, recalled 2024 vote

TWO-WAY SHARE, RECALLED

13.1 point margin, Trump, certified 2024 result

RECALLED MARGIN BY GROUP

Women	Trump +2
Men	Trump +20
Unaffiliated	Harris +8
Suburban	Trump +11
Rural	Trump +20

THE BASELINE

Respondents recall a 50.3 to 39.4 Trump vote, a 10.9-point margin. Alaska's certified 2024 result was Trump 54.5 to Harris 41.4, a 13.1-point margin.

WHAT IT MEANS

The sample recalls a margin 2.2 points narrower than the certified result. Sullivan's ballot edge does not rest on an over-Republican sample.

REPORTING NOTE

Column percentages on the voters-only base of 737. Certified result from the Alaska Division of Elections; recall responses typically understate the winner's margin.

Q7 · DEMOGRAPHIC DETAIL

In the 2024 election for President, did you vote for Republican Donald Trump, Democrat Kamala Harris, someone else, did you not vote in that race, or are you unsure?

GENDER GAP

Men recall Trump by 20 points; women by 2.

PARTY

Republicans recall Trump 89 to 4; Democrats recall Harris 85 to 5. Unaffiliated voters recall Harris 48 to 40.

REPORTING NOTE

Whole-number column percentages. Neither combines someone else, did not vote and unsure. † = base under 80; race is modeled from the voter file.

BASES AND MARGIN OF ERROR

What each number can carry.

ANALYSIS BASE	95% MARGIN OF ERROR	REPORTABLE
758 full study	±4.0 pts	Yes
300 to 400	±5.5 to ±6.3 pts	Yes
150 to 250	±6.9 to ±8.9 pts	Yes, with base
80 to 149	±9.0 to ±12.3 pts	Directional
Under 80	wider than ±12.3 pts	Transparency only

Margins are calculated at the 95 percent confidence level for an estimate near 50 percent and include the survey design effect of 1.25. Subgroups marked † should be interpreted as directional. The conditional follow-up questions (Q2 and Q4) do not use the full-sample margin of error.

QUESTION BASES

Q1 · U.S. Senate ballot	**n=737**
Q2 · Forced lean, Q1 undecided	**n=37**
Q3 · Two-candidate U.S. Senate ballot	**n=737**
Q4 · Forced lean, Q3 undecided	**n=35**
Q5 – Q7 · Favorability and 2024 recall	**n=737**

SMALL BASES IN THIS WAVE

18–29 Age	n=74
Unknown Education	n=70
Town Metro type	n=58
Juneau Media market	n=46
Other Race / ethnicity (modeled)	n=51
Hispanic Race / ethnicity (modeled)	n=31
Asian Race / ethnicity (modeled)	n=29
Black Race / ethnicity (modeled)	n=14
Q2 · forced lean Conditional follow-up	n=37
Q4 · forced lean Conditional follow-up	n=35

QUESTION BASES

The Senate ballots, the favorability questions and the recall question were all asked of the voters-only base of 737 likely voters.

DIFFERENCES

The margin on a difference between two candidates is roughly ±8.0 points; a lead inside it is an edge, not decisive.

REPORTING NOTE

Design effect 1.25; effective sample size 607.

AT A GLANCE

The headline figures

QUANTUS INSIGHTS

Sullivan +0.6

U.S. Senate ballot, full sample

Sullivan +0.3

U.S. Senate ballot, two candidates

Peltola +12

Ballot margin among women

Sullivan +11

Ballot margin among men

Peltola +28

Ballot margin among urban voters

Sullivan +21

Ballot margin among rural voters

Peltola +17

Ballot margin among suburban voters

A STATISTICAL TIE

Sullivan leads by 0.6 as asked and 0.3 head to head, well inside the roughly ±8.0 margin on a difference. He holds men, rural voters and voters 65 and over; Peltola holds women, urban, suburban and unaffiliated voters.

WHERE IT IS DECIDED

Unaffiliated voters, 47 percent of the sample, back Peltola 56 to 34 with 5 percent undecided. The 8 percent not yet with either nominee is ten times the gap; the ranked-choice final round will allocate it.

REPORTING NOTE

Margins are computed from unrounded topline shares and may differ by a tenth from the rounded figures shown.
