DURHAM, NH - Democrat Troy Jackson leads incumbent Republican Susan Collins in the Senate race in Maine. But despite leading in the horse race, most Maine voters think that Collins will win the election. Former Republican Governor Paul LePage has opened a small lead in Maine's Second Congressional District, while Democratic incumbent Chellie Pingree holds a comfortable lead in the First Congressional District. Democrat Hannah Pingree continues to lead Republican Bobby Charles in the race for governor. Democrats have effectively nationalized this election as a referendum on President Trump and Democratic voters are more interested and motivated than Republicans.

2026 Senate Election

Democrat Troy Jackson has opened a lead over incumbent Republican Senator Susan Collins in the home stretch of the race for U.S. Senate in Maine. Including those leaning towards a candidate, 54% of likely voters say they will or already have voted for Jackson, 45% say they will vote or already have voted for Collins, less than 1% support another candidate, and less than 1% are undecided. In September, 51% supported Jackson while 47% supported Collins. Nearly all Democrats (98%) support Jackson, up from 94% in September, while 98% of Republicans support Collins, unchanged since September (98%). Pine Tree State Poll Methodology

These findings are based on the latest Pine Tree State Poll, conducted by the University of New Hampshire Survey Center. Pine Tree State Panel members were sent an invitation to complete the survey and 1,262 completed the survey online, yielding a response rate of 46%. In addition, 460 Maine residents completed the survey after receiving an invitation via text message to complete the survey. Overall, 1,722 Maine residents completed the survey online between October 27 and October 31, 2026. The margin of sampling error for the survey is +/- 2.4 percent. Included in the sample were 1,654 likely general election voters (margin of sampling error +/- 2.4 percent), 843 of whom reside in Maine's First Congressional District (MOE +/- 3.4 percent) and 802 of whom reside in Maine's Second Congressional District (MOE +/- 3.5 percent). In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. These MSE's have not been adjusted for design effect. The design effect for the survey is 2.3%.

The Pine Tree State Panel is a probability-based web panel of Maine residents. Approximately 3,200 Maine adults have been recruited from phone, text-to-web, or mail-to-web surveys sent to randomly-selected phone numbers or addresses. Panelists are then asked to participate in online surveys sponsored by the UNH Survey Center.

Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the ME Secretary of State and to 2024 election results in Maine. Surveys were taken in English, all respondent data included passes Qualtrics data quality checks, and single-use survey links were used to prevent multiple submissions by respondents.

The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions. Due to rounding, percentages may not sum to 100%. All coding of open-ended responses is conducted using AI coding software.
